FLYNN.

THE ZERO-UI FINANCIAL OPERATING SYSTEM FOR THE DESKLESS ECONOMY.

Replaces complex SaaS dashboards with a proactive, team-wide text thread.

THE ”DASHBOARD TAX” IS KILLING CASH FLOW IN THE TRADES.

DESKLESS WORKERS DON’T USE LAPTOPS

A plumber covered in mud or a landscaper driving a ute physically cannot navigate a 50-screen SaaS dashboard on a job site.

DELAYED BILLING

Admin gets pushed to nights and weekends, causing severe cash-flow leaks and late invoices.

TEAM FRICTION

Current apps force complex "per-seat" onboarding, app downloads, and login creation for every single crew member.

ZERO UI. PURE EXECUTION.

Proactive Text Agent

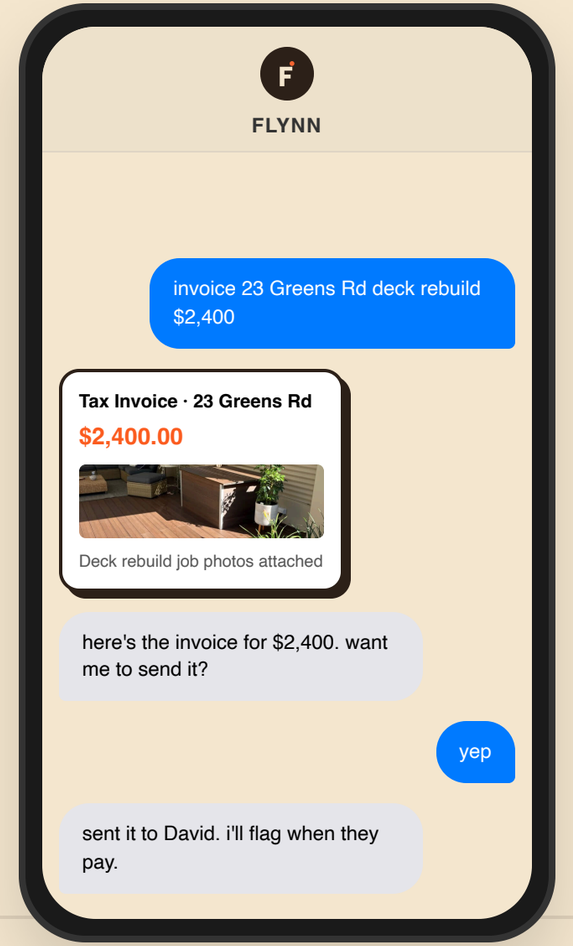

No apps. No dashboards. Tradies simply text or voice note Flynn.

Automated Admin

Flynn instantly generates quotes, texts tracking links, and automatically chases down late payments.

Multiplayer with Zero Logins

An entire crew texts photos of receipts and hours to the exact same Flynn number. No account creation or per-seat fees required.

MONETIZING THE FLOW OF CAPITAL.

1%

PLATFORM FEE

Taken directly at point of settlement

THE BUSINESS MODEL

We bypass traditional SaaS subscription friction by charging a flat 1% platform fee on top of payment processing costs at the point of settlement.

THE MARKET

Over 1.2 million tradespeople in Australia alone, and tens of millions globally.

THE SCALE

Capturing just 5% of the massive, un-digitized transactional volume moving through the deskless economy represents a multi-billion dollar annual revenue opportunity.

EARNED INSIGHTS & BUILT-IN DISTRIBUTION.

900+

FIELD JOBS HANDLED

Founder personally ran a logistics and removals business with an unblemished 100% 5-star track record on Airtasker—experiencing the problem firsthand.

1,400+

ACTIVE TRADESPEOPLE NETWORK

Previously built Mates Rates, a localized services marketplace, establishing a proprietary distribution loop to acquire Flynn users at zero cost.

8

BETA TESTERS SECURED

Launched the Flynn alpha architecture weeks ago and immediately locked in our first 8 paying beta testers.

BUILT BY OPERATORS.

ATTICUS JACKSON – FOUNDER & CEO

- 4th-year Bachelor of Engineering (Honours) / Bachelor of Business (Finance) student at Queensland University of Technology (QUT).
- Full-stack software builder specializing in Node.js, Vercel deployments, database replication, and LLM orchestration.
- Hands-on domain experience running physical trade operations.

BUILDING THE FINANCIAL INFRASTRUCTURE FOR THE PHYSICAL WORLD.
